

We are actually looking for a

Junior Solution Sales Supply Chain Management
with a focus on Forecasting/Inventory Management/S&OP

Optimact: Who we are?

Optimact has the ambition to help companies improve their inventory management and support their forecasting process. Optimact has the know-how and a lot of experience on inventory management and forecasting and shares those to help companies. This know-how and experience is translated in the Optimact tool where it's offered automatically to the user. Optimact is a cloud based solution.

Our approach is recognizable by our focus on getting measurable results, transferring our knowledge to our clients and coaching them to achieve future success. Working alongside our clients we create practical action plans that enable them to make their vision a reality.

We consider Optimact as a tool to achieve the company objectives : results. Without any action on a number of external factors, like processes and organisation, even the best tool in the world will not deliver results. That's why Optimact has developed a broad toolkit that uses the tool as a mean only to get results.

Function: What we are looking for?

As Optimact Junior Solution Sales you'll have the opportunity to use your entrepreneurial spirit and expertise in selling solutions with our technology specialized in supply chain planning, analysis and optimization to accomplish great things! You'll lead sales and marketing efforts. You will perform the necessary tasks to build a sales pipeline and coordinate the appropriate marketing approach for lead generation. You will also have

the opportunity to work directly with our consultants translating feedback from our customer towards our solutions.

Responsibilities:

- Develop strong customer relationships and solution/project sales opportunities
- Develop complete proposals that add value to the customer with technology and consulting services.
 - Work with our solutions team in order to assess and guarantee excellence in delivery, from the proposal and initial engagements.
- Play an important business driving role in a fast growing company with significant career opportunities.
- Great opportunity for personal economical gain in a market that is still to be significantly explored and exploited.
- Continuous challenge to identify and reel in new customers in both technology and consulting services.
